

PI PROP INTELLIGENCE

CURRENT APPLICATION FEATURES

Authoritative web/PWA feature, access, provider, and limitation inventory

CURRENT EDITION Updated through August 21, 2026. Web/PWA release; no App Store or Play Store distribution is assumed.

Prepared for PI PROP INTELLIGENCE LLC

Independent sports research and intelligence only. PI does not facilitate wagering or accept bets.

Contents

- 1. Product access**
- 2. Supported sports and prop sites**
- 3. Navigation and workspace**
- 4. Market discovery**
- 5. Research and intelligence**
- 6. Scoreboards and game markets**
- 7. Build, slips, and history**
- 8. Chat and notifications**
- 9. Accounts and membership**
- 10. Owner operations**
- 11. Reliability and security**
- 12. Recent changes**
- 13. Current limitations**

1. Product access

Surface	Address / delivery	Capability
Public site	propsintell.com	Product, feature, pricing, terms, privacy, contact, install, and sign-in entry.
Application	app.propsintell.com	Responsive Flutter web/PWA for desktop, tablet, and mobile browsers.
Updates	Automatic web release	No App Store or Play Store download required; update prompt loads the newest bundle.
API	api.propsintell.com	Authenticated data, intelligence, tracking, billing, and owner operations.

2. Supported sports and prop sites

Sport	Feature coverage
MLB	Baseball player props, scoreboard, game markets, Strikeout Pro Gold, and MLB umpire context.
NFL	Football player props, scoreboard, game markets, injuries, line movement, and research tools.
NBA	Basketball props, scoreboard, game markets, injuries, and referee tendencies.
WNBA	Basketball props, scoreboard, game markets, injuries, and referee tendencies.
NHL	Hockey player props, scoreboard, game markets, and research tools.
Soccer	Supported competition props, scoreboard/game context, and market research; availability varies by league.
NCAAF	College football props and scoreboard/game context when scheduled markets are available.
NCAAB	College basketball props and scoreboard/game context when scheduled markets are available.
CFL	Canadian football props and game context when provider inventory is available.

Prop site	Current behavior
PrizePicks	Pick'em prop inventory. PI displays provider lines and tracks research selections; confirm rules in PrizePicks.
Underdog	Fantasy pick'em inventory and tracked slip presentation; provider rules and multipliers

Prop site	Current behavior
	remain authoritative.
FanDuel	Sportsbook prop and game-market inventory where licensed data is available; verify price/odds in FanDuel.
DraftKings Pick6	Pick6 prop inventory, separate from DraftKings sportsbook lines.
Draft Picks	Normalized provider label used when this feed returns inventory; do not confuse it with DraftKings.
Betr	Betr Picks inventory where the connected feed provides active markets.

3. Navigation and workspace

Navigation group	Current destinations
Top banner	Scoreboard, Sports, MLB, NFL, NBA, WNBA, NHL, Soccer, NCAAF, NCAAB, CFL, Owner Ops.
Research	Today's Briefing, Market Board, Search Players, Line Movement, Injury Impact, Analytics, Prop Chat, Score Watch, The Lab, Referee/Officiating Tracker, EV Scanner.
Build	Prop Builder, Build Performance, Slip Watcher.
History	Past Slip History, Track Record.
Specialty / Owner	Strikeout Pro Gold; Owner Operations Center for the verified owner.
Utility rail	Account, active Slip, current live prop count, and membership badge.

4. Market discovery

- Live multi-sport prop catalog with provider, event, market, line, update, and freshness identity.
- All Prop Sites plus six normalized site filters; More menu for overflow.
- Provider-separated sections and balanced rows with no blank placeholder slots.
- Search, sport, provider, category, side, tier, confidence, verdict, and sort controls.
- Sport-aware category counts, playable counts, Best Now, Slight Edge, Better Line, Wait/Monitor, and All Props groups.
- Schedule-aware empty state with first event, countdown, upcoming games, market-opening guidance, session notifications, and historical research direction.
- Stable keyed headshots with previous-frame retention and branded initials/silhouette fallback.
- Over/Under selection, explicit undo/removal, favorite, and EP-only player-market overlay.

- Readable translucent View Research overlay with enlarged text and scrolling.

5. Research and intelligence

Feature	Minimum access	Status / purpose
Today's Briefing	Public/Core	Daily qualified opportunities and explicit caveats/no-play outcome.
Search Players	Public/Core	Focused active market and provider comparison.
Analytics	Core	Result and performance filtering with sample context.
Line Movement	Core	Persisted opening/current line history, freshness, direction, and provider comparison.
Injury Impact	Pro	Verified availability, role, usage, opportunity, and teammate-context changes.
EV Scanner	Pro	Qualified estimated EV, fair probability, edge, and offered-price comparison.
Intelligence Lab	Pro	Correlation, scenarios, simulations, fatigue, matchup, and historical analogs.
Officiating Tracker	Pro	NBA/WNBA referee and MLB umpire tendencies; NFL not implemented.
Prop Alerts	Pro	Tracked condition and line-change alerts.
Strikeout Pro Gold	Pro	MLB strikeout model workflow with methodology/explainability.

6. Scoreboards and game markets

- Live, upcoming, and final scoreboards with date and sport filters.
- Local 12-hour time, event status, score, league, and supported game detail.
- Score Watch for selected games and score/final/extended-play alerts.
- Game Markets for moneyline, spread, total, and available book comparison.
- Scoreboard schedule powers empty-sport season/market status panels.

7. Build, slips, and history

- Manual Prop Builder with sport/site/category and minimum research thresholds.
- Same-provider and duplicate-market protections.
- Active Slip review with provider-specific presentation, add/remove, save/lock, and status.
- Slip Watcher live values, game status, grading, settlement, and automatic movement to history.

- Past Slip History All/Won/Lost filtering, readable ticket cards, today win/loss percentage, and historical result context.
- Track Record keeps model winners and losses visible with sample-size context.
- Build Performance analyzes ticket and leg outcomes by sport, site, player, and market.

8. Chat and notifications

- Community Prop Chat and privacy-safe usernames.
- Direct contacts, mentions, unread badges, HTTPS links, attachments, shared props, and shared slips.
- Owner identity/message treatment in gold and separate role authorization.
- Floating chat bubble with dismiss/restore behavior.
- OneSignal web push and persisted sound preference where browser permission exists.

9. Accounts and membership

Capability	Core	Pro / Owner
Live board, search, provider comparison	Included	Included
Scoreboard and Game Markets	Included	Included
Manual builder, active slips, tracking	Included	Included / enhanced
History and Track Record	Standard/recent	Full/advanced
System Over/Under model direction	Not shown	Qualified signals only
Projection, confidence, edge, advanced line context	Factual/basic	Included when qualified
EV Scanner, Lab, Injury, Alerts, Officiating	Not included	Included
Strikeout Pro Gold	Not included	Included
Owner Operations	Not included	Verified owner only

Customer-facing tiers are Core and Pro. The verified owner receives protected owner functions without weakening server-side role checks. Pricing displayed in the live application and billing platform is authoritative.

10. Owner operations

- Run All Checks production control panel.

- API, database, Redis, workers, queues, provider quality/quota/freshness, scoreboard latency, billing, grading, users, and deployment signals.
- Provider state distinguishes active inventory, healthy/no inventory, stale, and outage; last successful update and owner alerts are supported.
- Issues Requiring Review for questionable grades, unsettled tickets, pipelines, providers, and billing.
- Owner-only top four qualified picks per sport, subject to normal data and release gates.
- Owner tier preview and account-role management remain separate from customer billing tier.

11. Reliability and security

- Compressed distributed prop catalog plus durable catalog recovery.
- Background provider refresh, retries, cooldowns, quota reserve, and stale disclosure.
- Persistent line snapshots for movement and closing-line analysis.
- Stable skeletons, image fallback, no black headshot state, and reduced layout movement.
- Supabase authentication, PostgreSQL RLS, backend access enforcement, CORS, rate limits, and safe logs/errors.
- GitHub-driven release traceability with Vercel frontend and Render backend deployment.

12. Recent changes included in this edition

Area	Updated behavior
Navigation	Sports across top; Research/Build/History on left; scoreboard retained; owner utility rail labels.
Providers	Separated provider sections, More overflow, normalized sites, active/no-inventory/stale/outage status.
Cards	Stable images, explicit selection undo, EP-only player overlay, research modal, no external provider strip.
Empty sports	Schedule-derived market/preseason/offseason panel with real event countdown.
Line Movement	Recorded snapshots hydrate opening/current values.
Officiating	MLB umpires added to NBA/WNBA referee support.
History	Readable result text and current win/loss percentage.
Responsive	Balanced card rows, collapsible side groups, mobile density reductions, and clipping protections.

13. Current limitations

- Live inventory depends on provider schedule, subscription coverage, geography, market release, quota, and upstream health.
- NFL officiating ingestion is not yet available and is not shown as an empty tab.
- Headshot quality depends on mapping/source availability, but the interface should always retain a branded fallback.
- Web/PWA is the supported release. Native-store distribution is not part of the current launch plan.
- PI does not execute transactions, guarantee outcomes, or override an external operator's market and settlement rules.
