PROP INTELLIGENCE

OPERATING COSTS & RENEWAL CALENDAR

Owner reference | Fiscal year 2026-2027

IMPORTANT: COMPLETE THE HIGHLIGHTED FIELDS

The application configuration identifies the services required to operate PI Prop Intelligence, but private invoice amounts and renewal dates are not stored in source control. Every CONFIRM field must be completed from the latest vendor invoice or billing dashboard. Never place passwords, API keys, card numbers, or service-role secrets in this document.

6. MONTHLY OWNER BILLING ROUTINE

- On the first business day, review every vendor dashboard and reconcile charges against the business account.
- Confirm domain expiration dates, Apple membership status, payment cards, and billing-contact email access.
- Review usage limits for Render, Supabase, Vercel, Codemagic, RevenueCat, OneSignal, Resend, and each sports-data provider.
- Investigate unusual increases, failed payments, quota warnings, stale feeds, and services that are no longer used.
- Export invoices and receipts to the secure accounting folder using YYYY-MM - Vendor - Amount naming.
- Update this document after every price, plan, payment method, renewal date, or vendor change.

7. IMMEDIATE COMPLETION CHECKLIST

DONE	OWNER ACTION
[]	Enter the exact charge and next billing date for every CONFIRM field.
[]	Record the legal billing account name and billing contact for each critical service.
[]	Set 30-day and 7-day calendar reminders for annual renewals and domain expirations.
[]	Confirm backup payment methods for Apple, domains, hosting, authentication, and email.
[]	Verify that all invoices are delivered to an owner-controlled email account.
[]	Cancel duplicate or legacy services only after confirming production does not depend on them.
